CHECKLIST OF MPI BULLETINS

This checklist includes active bulletins published on or before January 31, 1984 and obsolete bulletins canceled June 30, 1983, through January 31, 1984. Bulletins not appearing on this list (except those published after January 31, 1984) are obsolete and should be removed from active files.

| NUMPEF/ DATE | SUBJECT | OPIC. STAFF CATEGORY DIST. CODES |
|-----------------|--|---|
| 11 6/23/72 | Plant Operating Schedules Working Conditions, Poultry Plants | FO/A S-12, S-13, FS-14, S-15, FS-16, ES-16, ES-16-1, ES-16-2, S-17, S-18 (Poultry Plants) |
| 211 2/20/73 | Net Weight Compliance | PLS/G 0 |
| 263 4/6/73 | Waste Disposal Permit | FO/B P, C, U-2 |
| 392 8/10/73 | Cured Meat Product Labeling | PLS/F C, P, T, U-U-2 |
| 418 8/31/73 | Labeling Standards for Certain Cooked Sausages | PLS/F C, P, T, U-U-2 |
| 456 10/19/73 | Warm Cut-up and Deboning of Poultry | ISF/D 0 |
| 553 1/2/74 | Extension of Time for Cured Meat Product Labeling | PLS/F C, P, T, U-U-2 |

Malachite Green Screening Test for Sulfite

The Malachite Green Screening test was originally developed to test for the presence of sulfites in fresh meat products. Later, this screening test was applied to fresh poultry products. Some interferences have now been found to occasionally occur in the Malachite Green Screening test when used on fresh poultry products.

Therefore, do not retain product when a positive Malachite Green test is observed in fresh poultry product. Select a sample of the product and send it to the regularly assigned Field Service Laboratory for a quantitative sulfite test.

EXPORT OF BEEF LUNGS TO MALAYSIA

The Malaysian veterinary officials have informed us that beef lungs can be exported to Malaysia providing the following conditions are complied with:

1. The lungs must originate from plants approved for export to Malaysia, and must be accompanied by a Halal certificate issued by an approved Islamic Center. See MPI Bulletin 83-37.

2. The lungs must be undenatured and labeled according to Section 325.8 of the Meat and Poultry Inspection Regulations, i.e., "Beef Lungs - Not Intended for Human Food."

3. The only USDA certification which should be issued is a dated USDA letterhead indicating the weight, number of cartons, title of MPI veterinarian signing letterhead certificate, e.g., D.V.M, Veterinary Medical Officer, which specifies the following statements:

"The undersigned certifies herewith:

a. The lungs originate from animals that passed antemortem and postmortem inspection and were inspected as follows: anterior, middle and posterior mediastinal, and right and left bronchial lymph nodes were incised and the curved surfaces of the lungs were palpated.

b. Foot and mouth disease has not existed since 1929, and rinderpest has never existed in the United States.

c. The lungs covered by this certificate originated from animals slaughtered in Est. (Number)."

DISTRIBUTION:

EXPORT CERTIFICATES FOR FRANCE

The French veterinary officials have informed us that MP Form 412-11, "Sanitary Certificate for Export to France", is no longer needed for shipments destined to France.

The following forms should be issued for fresh/frozen meat and meat byproducts:

1. MP Form 130, "Meat and Poultry Export Certificate of Wholesomeness."
2. MP Form 150, "Animal Health Certificate."
3. MP Form 81, "Certificate Which Must Accompany Imported Frozen Meats, Offals, Poultry, Animal Products and Products of Animal Origin."

For horsemeat, issue the same forms described above with the exception that MP Form 414-3, (horsemeat certificate), should be substituted for MP Form 130.

The following forms should be issued for processed meat products:

1. MP Form 130 (described above).
2. MP Form 412-12, "Health Certificate for Meat Products Intended for Consignment to a Member State of the EEC" (dated 12/81 or newer).

The following forms should be issued for poultry livers (other poultry is prohibited):

1. MP Form 130 (described above).
2. MP Form 81 (described above).
3. MP Form 82, "Sanitary Certificate".

DISTRIBUTION:

M91, M93, M94,

NOTICE EXPIRES:

April 18, 1985

OPI:

IP/ECD

Issue the following forms for edible product which is destined for animal food:

1. MP Form 130 for meat and meat byproducts (MP Form 414-3 for horsemeat and horsemeat byproducts).

2. MP Form 140, "Certificate to Accompany Meat and Offals Intended for Importation into France by the Pet Food Industry".

For pharmaceutical products, issue MP Form 17, "Certificate for Glands, Organs, and Offals Imported for Pharmaceutical Purposes".

This information should be used in conjunction with the requirements specified in Section 22.35 of the Meat and Poultry Inspection Manual and other notifications, e.g., labels for all products must be printed in the French language.

EXPORT OF FULLY CURED BACON, HAM, AND PORK SPARE RIBS
TO THE UNITED KINGDOM (UK)

Although Section 22.39(a)(2)(ii) on page 260a of the Meat and Poultry Inspection Manual specifies the curing statements required for fully cured bacon, ham, and pork spare ribs, British officials have further clarified certification requirements for certifying these products for export to the United Kingdom.

Un sliced (slab) bacon may originate from any USDA plant, however, fully cured sliced bacon, ham, and pork spare ribs must originate from plants which are certified to export further processed meat products.

In addition to issuing MP Form 130, the following statements must be specified on USDA letterhead and signed by an MPI veterinarian for export of fully cured bacon, ham, and pork spare ribs to the United Kingdom:

A. "The products are derived from:

1. animals which have remained in the territory of the United States of America for at least three months before being slaughtered or since birth in the case of animals less than three months old;

2. animals which have not come from holdings which for health reasons are subject to prohibition as a result of an outbreak of porcine brucellosis during the previous six weeks;

3. animals which have been subjected to ante- and post-mortem inspection by a veterinary officer approved by the Government of the United States of America and found to be healthy. "

AND EITHER

B. For sliced bacon.

"The bacon has been pumped with brine under a pressure of 50 lbs. or more to the square inch and subsequently smoked for a period of not less than 12 hours at a temperature of not less than 120°F."

OR

C. For ham, unsliced bacon and pork spare ribs.

1. "The product has been subjected to pumping with brine under a pressure of 80 lbs. or more to the square inch and subsequently soaked in brine or dry salting for a period of not less than four days."

OR

2. "The product has been subjected to salting (wet salting or dry salting) for a period of not less than ten days."

Information Regarding the PFF Regulation.

The final regulation for "Cured Pork Products; Control of Added Substances and Labeling Requirements; Updating of Provisions" was published in the Federal Register on April 13, 1984. This is the "PFF regulation" which covers cured pork products.

This rule revises Parts 318 and 319 of the Meat Inspection Regulations, but will not become effective until April 15, 1985. In the intervening year, the Agency will undertake a number of initiatives to assure proper implementation. These will include such things as distributing an information packet that generally explains the regulation and the concepts upon which it is based; distributing training materials for field personnel; participating in various industry meetings around the country to familiarize them with the regulation; doing a "dry run" or experimental testing of the computerized sampling techniques and information flow system; and any necessary revisions of the MPI Manual.
